Introduction

Koubek is a self-staking charity token that had its ownership renounced and given to the community upon its creation. This decentralization of power has allowed Koubek to flourish as a 100% community-driven charity project with markedly engaged holders and rapid growth on a daily basis.

Released May 21, 2021 on the Binance Smart Chain network, the Koubek project has been iteratively built and improved upon by volunteers within the community since its inception. Graphic designers, writers, web developers, influencers, marketers, data analysts, translators, and more have contributed their talents to help Koubek to grow into an inspirational model of community-driven success.

The project has become a unique social experiment in which the investors are integrated into the project both from a community and developmental standpoint. With progress plans developed with intense brainstorming of more than 10 months, Koubek stands as a solid milestone in this progressive, exciting age of the Social Blockchain.

Security

Koubek is safe by design. It is an ownership-renounced token with each buy and sell automatically contributing to a liquidity pool that is locked forever. Furthermore, half of the total supply was burnt into a dead address in the project's beginning. It is impossible to modify Koubek's contract, and it is impossible to pull liquidity from it. The team behind Koubek is a fully volunteer team.

- The ownership of Koubek was renounced upon its creation to a dead address. The Koubek Team consists entirely of community volunteers who are also invested in KBK.

- The initial liquidity and 50% of Koubek's total supply was sent to the dead address at the project's beginning.

With the help of investors' donations, the Koubek smart contract was professionally audited by TechRate, which confirmed the token as safe:

Audit Results

- No high-severity issues
- No medium-severity issues
- No low-severity issues – No owner privileges

Audit report is available to view on our official website – <https://www.koubektoken.com>

Helpful Notes

Dead address - Address that has no one has any control or access to essentially 'dead'

Liquidity pool - Is a pool of paired tokens that can be swapped between each other

- KBK-BNB = KBK can be swapped for BNB from the pool vice versa

Contract

- <https://bscscan.com/address/0x6e9A1428798Ff011E2cF369b129630f686232784>

Transparency

Transparency is one of the Koubek Team's highest priorities.

New volunteers are frequently added into the Koubek Team to ensure community representation, and community voting is regularly conducted to help decide the best direction of the project.

For example, community votes have been taken on most decision on how to allocate funds, which exchanges to focus on, which areas to donate to, and even which logo to use for the Koubek token. We hope to evolve this into a governance system involving the holdings of KBK.

Community Wallet

As a community-driven project with no dev wallets, the Koubek Team opted to create a community wallet on Genosis safe that members can donate to in order to further build the project.

The community wallet has multi-sig protection, making it so multiple people are required to approve any transaction.

The community wallet has vision to fund many causes for the Koubek project, including:

- \$20,000 for WhiteBit listing
- \$7,000 for CoinTiger listing and promotion
- \$5,400 for Indoex listing
- \$3,250 for UniRocket & PriceBot advertisements

The Koubek community has funded donations for **Forum ZDF**, a non-profit dog shelter in **Germany**.

Tokenomics

The tokenomics of Koubek are as follows:

- 1,000,000,000,000,000 initial total supply
- 50% of the total supply burnt & sent to a dead address prior to release
- 40% of the total supply will go for pre-sale.
- 500,000,000,000,000 max limit of KBK per trade
- Out of total transaction fees of 8% -
 - 4% goes to existing KBK Holders (Highest in the world)
 - 2% - Charity & donation
 - 2% - Marketing & InfrastructureThus it Grants KBK investors continual rewards for holding, as well as decreasing the circulating supply exponentially as the percentage of the dead address holding grows.

Passive-staking rewards in your wallet

As per the contract, Koubek holders automatically receive a distribution from 4% of each transaction of the Koubek token.

This function is a unique and easy way for holders to receive rewards directly to their wallet without the need to stake or farm on other platforms, this saves gas fees and allows compounding with the ease of mind.

The passive-staking rewards from holding KBK increase rapidly as KBK gains more recognition and thus more transaction volume.

“To see growing numbers of KBK in your wallet just by holding is priceless.”

Use Cases/Ecosystem

The volunteer software and web development team is constantly working to bring new utility to KBK. DesKBKe being only about two months old (launch date 05/21/2021), there are already various projects underway.

Upcoming Projects

KBKTracker (Beta)

Investors can easily follow their KBK token holdings and see exactly how much they've accrued from the auto-staking rewards.

<https://tracker.koubektoken.com>

<https://tracker.koubektoken.com>

KBKCharts (Beta)

A charting and analysis tool for all tokens on the Binance Smart Chain.

Once it is fully released, it will generate income from ad spaces and premium features that require KBK tokens to use, which will further help the burn and project funding.

<https://charts.koubektoken.com>

<https://charts.koubektoken.com>

KBKFarm

This will allow users to stake KBK-BNB v1 for points to redeem official Koubek NFTs, or buy them straight out. These NFTs can be traded in the marketplace, and the sales will go towards the Koubek community fund and artist as a minting fee. The funds raised will go towards charity, project development, and burning Koubek tokens.

The funds from NFT sales are distributed as follows:

- 15% goes to marketing
- 15% goes to charity donations
- 60% is sent to the KBK liquidity pool
- 10% for the minting and designing process

<https://farm.koubektoken.com>

<https://farm.koubektoken.com>

KBKSwap (Alpha)

Automated Market Maker tool that allows easier trading experience for new investors to buy KBK. Future plans to evolve this KBK Swap into a ecosystem much like PCS that will involve in a creation of a new token that is co-beneficial with KBK for staking, farms, own routing and trading fees towards burning and project development. Tokenomics must be intensively researched before proceeding to the next stage.

<https://swap.koubektoken.com>

<https://swap.koubektoken.com/>

KBKStore (Alpha)

This will allow users to purchase official Koubek merch via USD and will plan to integrate KBK to the payment system.

Creating a brand image and increase in needed funding that will go towards project development, charity and burning.

Preview here:

KBKStop (Planning and building)

A place to connect all the tools into one easy webpage, a social network that which is defined by wallet address

KBKFund (Planning)

This will be a fundraising platform which utilizes KBK as a currency to support those in need. A small service fee will be taken from each donation which will go to the Koubek community fund wallet.

KBKGames (Planning)

A section on the Koubek website that will allow you to play a variety of games in-browser, including a card trading game and potentially a lottery game.

Partnerships

Charity

Digital Gurukul (K2C)

Koubek (KBK) is the official token for Digital Gurukul crypto donations.
<https://www.digitalgurukul.in>

Digital Gurukul is Asia's leading Edtech company revolutionising the life of millions of students, working professionals with digital skills.

The Koubek Team plans to implement tools for automatic donations to be made to Digital Gurukul when users purchase certain KBK NFTs, Merch, and more. Now it is possible to donate KBK to K2C.

UniTracker (<http://unitracker.app/>)

Roadmap

1 (05/24/2021 - 06/10/2021)

- ✔ Website and branding
- ✔ Social media channels
- ✔ Pre sale of KBK
- ✔ Add Bscscan logo + social profiles
- ✔ Multisig community wallet
- ✔ TechRate audit

2 (06/10/2021 - 06/13/2021)

- ✔ Listings on price tracking sites (CoinMarketCap, Blockfolio...)
- ✔ Website redesign
- ✔ Donations to animal shelters (RoldaORG, KenneltoCouch, BulliesInNeed)
- ✔ Official Koubek NFTs and media
- ✔ KBKTracker
- ✔ KBKCharts
- ✔ IndoEx Listing – 23rd June 2021
- ✔ CoinTiger Listing - 27th June 2021

3 (06/28/2021 - onwards)

✅ WhiteBIT Listing - 6th May 2021

✅ Influencer and marketing funding

✅ KBKFarm

✅ KBKSwap

🕒 KBKStore

🕒 KBKStop

🕒 KBKFund

🕒 KBKGames

🕒 Further Charity & donations & partnerships

🕒 Listings on major CEXs

🕒 Governance token process/evolution of the project

Koubek Team

Because the ownership of Koubek was renounced upon creation, the Koubek Team is composed entirely of volunteers.

The leadership team are:

1 - Raj Padhiyar – Founder & CEO, Marketing, Communication & Investor relations

2 - Jay Wetzel – Operation supervisor

3 - Sue Castle - Software engineer & development

4 - Paul Wright – Senior Full stack development

5 - Denis Gillespie - Head - Product

6 - Marcin Kozlowski – UI/UX Specialist

7 - Kaustubh J – Digital Marketing Manager

There are also various groups structured under the Koubek Team, including but not limited to . . .

-Administration

48 members work together to coordinate the direction of the Koubek project and propose helpful use cases for the token.

-Marketing

15 members analyze how to optimize social outreach and manage official Koubek social media as ideally determined.

-Media

45 members design original images, videos, and music to promote the Koubek project in a professional and engaging way.

-Software/Web Development

22 members work together to build various applications which utilize the KBK token. This is where applications like KBKCharts and KBKTracker are built.

In addition to this, the Koubek Team has groups dedicated to writing/translation, communications, moderation, and support. The number of volunteers is ever-expanding as the Koubek project reaches a wider audience.
